

PROFESSIONALLY INSTALLED SMART HOME CONTROL

One App. Every Smart Device. Total Control.

Lights, locks, cameras, climate, sprinklers, your Tesla — every smart device in your home, unified into one dashboard. On the wall. In your pocket. Anywhere.

Real dashboard from a Piets Technology Solutions install — every room, every device, one screen

COMPLETE DEVICE COMPATIBILITY

If It's Smart, It Connects.

Home Assistant works with over 2,000 built-in integrations across more than 100 categories — Matter, Z-Wave, Zigbee, Philips Hue, Lutron, Sonos, SmartThings, Alexa, Google Home and thousands of brands. All on one screen.

Lighting

Dimming, color scenes, room-by-room schedules and sunrise/sunset timing.

Climate Control

Thermostats, zone heating and cooling, humidity and comfort tracking.

Smart Locks

Lock or unlock from anywhere, full access history, automatic night lock.

Cameras & Doorbells

Live feeds, motion clips and instant alerts pushed straight to your phone.

Garage Doors

See open or closed at a glance, plus timed auto-close if left open.

Sprinklers

Zone irrigation schedules, rain-skip, and soil moisture based watering.

Tesla & EVs

Battery percentage, charge status, range and charge start/stop control.

TV & Whole-Home AV

Control TVs, receivers, speakers and volume in any room from one app.

Smart Plugs

Scheduling plus per-device real-time power draw and cost tracking.

Sensors & Alerts

Door/window contacts, motion, temperature, humidity and water leak alerts.

Energy Monitoring

Live whole-home watt usage, daily cost estimate and historical trends.

Voice Assistants

Works right alongside Amazon Alexa, Google Home and Apple HomeKit.

Why Homeowners Love It

● Local & Private

Everything runs on your own home network — not a company's cloud. Your camera feeds and door logs never leave your house.

● Keeps Working Offline

Internet outage? Your lights, locks, sensors and automations keep running. No connection required to control your home.

● No Subscriptions Ever

Open-source software with zero monthly fees. No vendor can raise your price, discontinue your hub, or lock you out.

Don't see your device? Ask us — chances are we can bring it in

HOW IT WORKS

Your Home, On Autopilot.

Control everything yourself from a wall tablet or your phone — or let your home handle it without being asked.

Wall-Mounted Tablet

A tablet mounted in the kitchen, entry or bedroom. Always-on live control, no phone needed.

Control From Anywhere

On vacation? Check any camera, lock a door, or turn the heat down from anywhere in the world.

Scenes — One Tap

"Movie Night" dims the lights, powers the TV, locks the doors and sets the temperature.

Automations — No Tapping

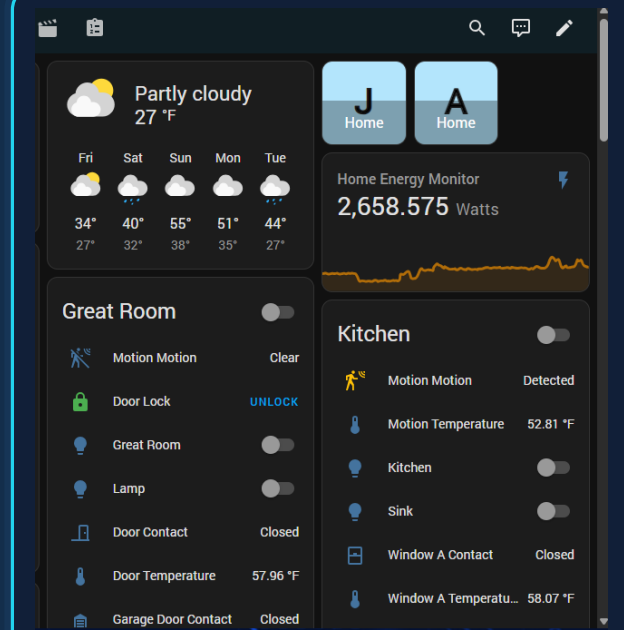

Front door opens after sunset, porch light comes on. Nobody home, the thermostat pulls back.

Tesla On Your Dashboard

Battery percentage, charge state and range, right beside your lights, locks and thermostats.

Energy & Leak Alerts

Watch live power draw to cut your bill — and get alerted the second a leak is detected.

Live status at a glance — real client dashboard

Sunset

Porch & path lights on

Bedtime

Doors lock, lights off, temp set

Away

Cameras armed, heat pulled back

Leak

Instant alert to your phone

FREE CONSULTATION · NO OBLIGATION · WE COME TO YOU

Call (631) 871-5957

We assess your home, show you exactly what's possible, and handle the entire installation.

Fast · Clean · Done right the first time · Supported after install
